AIS Dichotomous Map (ICD-9 to AIS 2008, and ICD-10 to AIS 2008 for 3+ vs <3 vs Indeterminate)

AAAM has developed the AIS Dichotomous Map (ICD-9 to AIS 2008, and ICD-10 to AIS 2008 for 3+ vs <3 vs Indeterminate) which is a tool for use in mapping ICD 9 and ICD 10 codes to AIS severities. The map is available to those who have purchased an AIS 2005 Update 2008 Dictionary. If you are interested in obtaining the map, please contact AAAM Headquarters at info@aaam.org with your AIS 2005 Update 2008 Dictionary proof of purchase. Proof of purchase may include a receipt for an AIS 2005 Update 2008 Dictionary purchase or proof of attendance to an AIS 2005 Update 2008 Injury Scaling Course after Jan. 1, 2009. If you cannot provide proof of purchase, the AIS Dictionary may be purchased within the publication section of the AAAM website and the AIS Dichotomous Map will be included with the order. The AIS Dichotomous Map may not be reproduced or distributed, in whole or in part, without prior written permission of AAAM. ©Copyright 2015. Association for the Advancement of Automotive Medicine.
